FALL 2023
NO ADDED PFAS

Giving 25% of Profits

World Centric began as a non-profit organization to raise awareness of global issues like inequality, poverty and environmental degradation.

In 2022, as many as 685 million people lived on less than \$2.15 per day. Many communities around the world lack access to basic necessities like food, water, sanitation, education, and healthcare. Climate change exacerbates the cycle of poverty for these groups, which lack the

resources to mitigate extreme environmental changes.

Since 2009, World Centric has given 25% of our annual profits to support grassroots organizations fighting social and environmental injustice both in and with communities living on less than \$2.15/day - World Bank's Extreme Poverty Line. We believe that a better world starts with supporting access to basic necessities and economic opportunities.

This year, our grants to partner organizations are focused on these critical areas:

COMMUNITY
DEVELOPMENT

ECONOMIC
EMPOWERMENT

HEALTHCARE

INDIGENOUS
LAND RIGHTS

K-12
EDUCATION

REFORESTATION

WASH (WATER,
SANITATION &
HYGIENE)

Total Giving
\$13,685,142
Since 2009

With profits from 2022, World Centric provided 30 grants to the 20 non-profits listed below. Through our giving, we hope to not only provide assistance but help create systems change at the root of the issues. Read our feature on Rainforest Action Network (RAN) on pg. 45 of the catalog and on our website at worldcentric.com/giving.

Introducing

Leaf Plus™

Plant-Based Oil Resistance

Real Leaders
Eco Innovation Award

ChemForward
Safer Designation

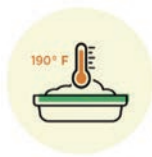

Leaf Plus® is World Centric's proprietary alternative solution to replace PFAS chemicals for grease resistance in molded fiber products.

Leaf Plus is a first in the marketplace and is being rolled out on select fiber products this year. Plant-based with no bioplastic, Leaf Plus has also received a Real Leaders award in Eco Innovation and the ChemForward Safer designation, assuring that it is not a regrettable replacement for PFAS. Learn more at worldcentric.com/leafplus.

Key Benefits

Sustainable Materials
Composed of plant-based ingredients with no added PFAS

Performance
Oil and grease resistance for temperatures up to 190° F

Compostable
Meets testing standards for compostability

Per- and Polyfluoroalkyl Substances, commonly referred to as PFAS, have traditionally been used for oil resistance in molded fiber products. The use of PFAS in foodservice packaging is now banned in seven states including California and New York, with many more states looking to regulate them in the near future.

World Centric is addressing these bans by introducing new SKUs which contain no added PFAS chemicals. There will be no change in pricing for these updated items. The current catalog contains all PFAS free items and confirms our commitment to producing safe and sustainable products for our customers without sacrificing compostability.

The PFAS free SKUs are denoted by ending letters as follows:

SKU Ending	Details
-LF:	Product does not have any oil resistance, e.g. fiber lids which do not need oil resistance
-L-LF:	Oil resistance is provided by PLA lamination
-LFP:	Leaf Plus, World Centric's proprietary, plant based compostable solution for high temperature grease and oil resistance
-LFS:	Industry PFAS free solution, suitable for use with food below 140°F (may work at higher temperatures as well)

For more details, please check with your Sales Manager or Account Manager or reach out to sales@worldcentric.com.

Business & Sustainability Certifications

As well as being a California Benefit Corporation that incorporates social impact into the core mission of our business, World Centric maintains the following business certifications and memberships. Learn more about our certifications at worldcentric.com/certifications.

As a certified B Corporation since 2010, World Centric meets rigorous standards of social and environmental performance, accountability, and transparency. A score of 80 is required for certification and this year our B Corp score was 120.5. Our certification is good through 2025. Learn more at bcorporation.net.

World Centric's 2023 B Corp Score

Blue: World Centric's Score - 120.5

Green: Minimum Score to Qualify - 80

Yellow: Median Score - 50.9

Other Key Memberships and Partnerships:

World Centric maintains the following sustainable product certifications from third-party verifiers:

Using Business as a Force for Good

Composting Advocacy

World Centric's products are designed with the end of life in mind. Ideally, the end is in a compost system which will allow the products to return to the earth. The unfortunate reality is that many of our products do not reach their intended final destination. There are several barriers preventing compostables from being properly discarded which include a lack of composting infrastructure, access to composting collection or drop off and overall lack of awareness of the benefits of compostables by consumers and businesses.

We are striving to change that through our participation in numerous composting advocacy groups that lobby for more widespread access to composting in North America. Our Resource Recovery Team participates in the following:

CalRecycle SB54 Advisory Board
Member of Plastic Producer Prevention Advisory Board

ASTM
Participate in working group to develop in-field compost standards

Sustainable Packaging Coalition
Active with the Compostable Packaging Collaborative

U.S. Composting Council
Member and supporter of the U.S. Composting Infrastructure Coalition

Biodegradable Products Institute
Participate with Legislation and Advocacy Committee for both the US and Canada

CA Compost Coalition
Member

NEW!

BAMBOO AND FIBER CUTLERY

World Centric's bamboo and fiber cutlery gives operators more sustainable choices to offer their customers for takeout. Made from fast-growing renewable plants, not plastic, our cutlery helps lessen our reliance on fossil fuels and cuts down on plastic waste.

World Centric's new bamboo cutlery is made from FSC® certified bamboo from sustainably grown and responsibly managed bamboo forests. Even better, our cutlery is a carbon negative product due to bamboo's ability to sequester carbon in its roots and the fact that it is made at a factory using solar energy. Learn more at worldcentric.com/bamboocutlery.

Why Choose Bamboo Cutlery?

- Made from 100% FSC® Certified Bamboo
- 100% USDA Certified Biobased
- Carbon negative product
- Suitable for hot or cold foods
- CMA approved and can be discarded with yard trimmings

FIBER CLAMSHELLS AND PLATES

World Centric molded fiber products are made from sustainable plants fibers like bamboo, sugarcane bagasse and wheat straw. Some of these materials are considered waste products and are burned as a way to manage them. We give them value by making them into compostable products.

COMPOSTER SUCCESS STORY

Oddstory Brewing and NewTerra Compost

Restaurants and composters are coming together across North America to tackle the urgent problem of food waste and its contribution to greenhouse gases through methane production. Read about one such partnership in Chattanooga, TN.

Oddstory Brewing founders Bryan and Jay Boyd

Oddstory Brewing + NewTerra Compost Chattanooga, TN

"Drink ours, tell yours." That's what Oddstory Brewing Company In Chattanooga, Tennessee hopes for customers to experience in a brewery built around the value of shared stories. Founded by father and son duo, Bryan Boyd and Jay Boyd, Oddstory's aim is to encourage people to come together, share stories and make new ones with a well-crafted beer in hand.

Oddstory Brewing Company beers live up to the "Odd" element because of their variety and uniqueness — beers like saison and sour styles that utilize mixed cultures to create adventurous flavors, or beers crafted with new-age brewing techniques using cryo hops and thiolized yeast.

Chattanooga is famous for its outdoor activities and love of nature, and Oddstory shares that passion. Since opening its doors, Oddstory has always been a company that tries to minimize waste and help the environment. Examples include using spent grain, a byproduct of brewing, to make pretzels, donating grain to local farmers, and donating beer to non-profit organizations that participate in outdoor clean-up projects such as creek clearing and trail maintenance.

With the opening of their restaurant and food trailer, Anomaly, the team wanted to continue their environmental record and sought out a 100% compostable solution for their packaging.

"With Anomaly there was huge potential to focus on an environmentally conscious approach to serving food; and that was through composting," explains Sam Sherak, VP of Sales at Oddstory Brewing.

Founded in the summer of 2020 by friends Normand Lavoie and Michael Ryan who saw a need for more compost opportunities, NewTerra Compost started as a small collection service from friends and neighbors. Fast forward to present day and the team has grown to five employees, three trucks, 500 residential members, 100 commercial members and over 2 million pounds of material diverted.

Early on, NewTerra saw the need to accept more compostable products to increase landfill diversion and reduce the amount of contamination. Adding compostable products allowed more events and locations that required single use items to implement composting programs. This is how NewTerra introduced Oddstory to World Centric, and the brewery immediately fell in love with the products.

"The durability of the World Centric products is also a huge element in Anomaly's implementation. Some dishes

from the Anomaly kitchen are hardy with decent weight and must be carried with one hand if the customer's other hand has a beer in it, but that is no problem for the World Centric products because they hold strong," explains Sam.

In just ten months since opening, Oddstory has been able to compost over 20,000 pounds of food waste and packaging with NewTerra. Now that's a story worth sharing over a beer.

If you have a story to share about using and composting our products, email marketing@worldcentric.com.

FEATURED IMPACT PROJECT

Rainforest Action Network

With profits from 2022, World Centric provided 30 grants to 20 non-profits. Our grants are focused on providing basic needs, as well as economic and community development for communities experiencing extreme poverty. Read more about our grant recipients at worldcentric.com/giving.

Rainforest Action Network funds communities fighting deforestation.

Funding Frontline Communities Fighting Deforestation in the Amazon Region and Southeast Asia

FUNDING TO DATE: \$359,459

Indigenous
Rights

Indigenous and frontline communities are the best stewards of the world's rainforests and the best organizers against climate change. History has proven that time and again — and that is why Rainforest Action Network (RAN) created the Community Action Grants program. These small grants support communities across the globe to protect millions of acres of forest, keeping carbon in the ground, and protecting the rights and self determination of local people.

RAN has two types of Community Action Grants:

1. Protect An Acre

Protect An Acre grants support grassroots leadership and local organizations in forest regions to protect threatened forest lands (logging, mining, etc) and to protect the human rights of communities that have co-existed with and depended on these regions for generations. These grants are critical to help local activists regain control of sustainably managed traditional territories.

2. Climate Action Fund

The Climate Action Fund (CAF) supports frontline communities directly challenging the fossil fuel industry. CAF provides grants to local groups tackling the root causes of climate change — the extraction and combustion of dirty fossil fuels such as coal and oil.

A WORLD CENTRIC FUNDED PROJECT

Land Rights for the Batak Toba in Indonesia

In the Lake Toba region of Northern Sumatra, Indonesia, 23 Indigenous communities have had their land stolen by Toba Pulp Lestari, a notorious company producing wood pulp and rayon fabric to make paper and cheap clothes.

They produce these products by clearcutting rainforest and growing industrial monoculture plantations of

pulp trees in their place. Many of these plantations are developed on Indigenous Batak Toba land without their consent, creating decades of land conflicts. Despite the fact that traditional land rights have been recognized within the Batak Toba community for generations, these rights have not been historically recognized by the Indonesian government. Many communities are taking action to protect or reclaim their lands.

With grants from World Centric and RAN, the communities are being supported with documentation including mapping and aerial photos of forest cover in their customary areas, and advocacy work as part of a multi-year effort to secure land rights to more than 50,000 acres of land. The grant also supported a delegation of 40 Indigenous Batak Toba community members to travel to Jakarta to directly pressure government officials.

To learn more and support their efforts, visit ran.org.

PRODUCT DONATION 360 Eats - Tampa, Florida

World Centric is committed to supporting organizations and events that align with our mission. We donate product directly to organizations doing work in the areas of social, environmental, and human rights.

Founders Ellen and Cameron Macleish. Photos courtesy of 360 Eats

It is our mission at 360 Eats to help reshape our food system to benefit humankind as well as our environment. We hope by doing so we can all work together to create a bright and healthy future for all.

– Founder Cameron Macleish

Product donation to support local families that are food insecure in Tampa, Florida

REGIONAL GIVING | FISCAL YEAR: 2022

Regional Partner

Bridging the gap between food waste and food insecurity, 360 Eats is a non-profit organization started by mother and son duo Ellen and Cameron Macleish to combat food waste. Their programs include mobile food rescue, their “sustain-a-bowl” food truck, and a compost initiative.

World Centric provides products for their food truck, serving weekly free meals to communities in food insecure areas.

SAVING FOOD

Partnering with local food establishments such as grocery stores, wholesale distributors, restaurants, and farms, 360 Eats provides food rescue services focused on items that would otherwise end up in landfills, including fresh and non-perishable ingredients. Even backyard gardeners can donate their excess produce.

360 Eats aims to be a zero-waste operation, rescuing food that can be utilized for nutritious meals and composting the leftovers.

Serving Food is a non-discriminatory program that provides a free service to all people, regardless of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, marital or family status.

SPROUTING FOOD

Finally, partnerships with local farms and composting initiatives as well as apps such as Make Soil and Waste No Food allow them to close the loop and fulfill their goal of a zero-waste system.

Donated food scraps are then left to break down into nutrient-rich soil, used to promote growth and sustainability within grassroots gardening practices in affected communities. Learn more at 360eats.org.

WORLD CENTRIC CUSTOM DESIGNS

Create recognizable branded designs that stand out

We collaborate with you to design leading edge solutions that meet your specific needs and reduce environmental impact. We do this by merging plant based materials with exceptional product design, engineering and manufacturing processes from the beginning to the end of your product's life.

Research, Discovery & Concepting

World Centric designs and manufactures a variety of custom products for the Consumer Packaged Goods industry. Our team of designers and product developers will work with you to develop sustainable and ownable packaging solutions.

Design, Prototyping, & Testing

The development of approvable physical samples is a key step in our process. We work with a variety of materials, processes, and high quality factories to realize your ideas quickly.

Manufacturing & Logistics Management

Our operations team can quickly bring your designs into production and delivered around the world. As a certified B Corp and member of the 1% For the Planet network, we follow our principles across our entire supply chain, logistics, and quality programs.

Scan the code for more information on our website at worldcentric.com/design or email sales@worldcentric.com.

Case Studies

Salads

A young, nationwide salad and healthy bowl brand was looking to reduce waste and introduce sustainable materials into their growing business.

Working closely with their creative team, our compostable materials enabled the creation of new shapes and forms, not possible with traditional manufacturing processes. These iconic forms have delighted customers and established a strong social media presence.

Noodles

A California based fresh noodle take-out chain needed help improving their existing product to be more sustainable, compostable, and usable.

Our custom lid solution combined with an easy to hold bowl shape, provided a simple and elegant way to ease preparation, maintain freshness and resulted in a truly enjoyable quick noodle experience.

Product specifications and composting rates

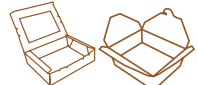

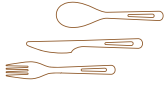

Sustainable Materials

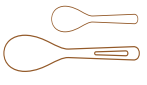

Our paper containers and molded fiber products are made from annually renewable plants such as bamboo, sugarcane bagasse and wheat straw, which also sequester carbon while growing. Paper cups, straws and bowls are made from sustainably sourced paper from FSC® certified sources.

Waste Reduction

When commercially composted, our foodservice ware diverts organic waste from the landfill. Composting also keeps waste disposal local and creates jobs in the local economy. Composting is a great way to reduce greenhouse gas emissions and improve soil health.

The information below is meant to be a general guide and testing is recommended in your establishment.

Hot Items 	Product	Heat Resistance	Freezer Safe?	Time to Compost*
	Plant Fiber Containers and Cutlery	Suitable for foods up to 450° F; Oven and microwave safe for short periods. Testing recommended	Yes	2-3 months
	White Paper Hot Cups/Bowls	Suitable for food and drinks up to 220° F; Not microwavable	Short Term Only	2-3 months
	NoTree® Paper Hot Cups/Bowls	Suitable for food and drinks up to 220° F; Not microwavable	Short Term Only	2-3 months
	NoTree® Paper Food Containers	Suitable for food up to 220° F; Heat lamp and warming oven safe	Short Term Only	2-3 months
	TPLA Cutlery	Suitable for foods up to 200° F; Dishwasher safe	Yes	2-4 months
	ZeroWare®	Suitable for foods up to 200° F; Dishwasher safe	Yes	N/A
